

Manual FIRE Button for Quick-Action Fire Suppression

The Troman Manual Switch is an emergency device that allows the driver to immediately activate the Troman extinguishing system and all vehicle emergency protocols. This switch is used to enhance the Troman Automatic Detection and Extinguishing Systems to provide the driver with control in emergency situations.

The switch is operated by twisting and pulling of the tamper seal, lifting the plastic cover and pressing the FIRE button. The Manual Switch can be used with all Troman multifunctional controllers
